Mineral and Guayusa Leaf Extract blend with organic nano-enhanced hemp flower terpenes

BENEFITS:

- 72 trace minerals
- Guayusa leaf for sustainable energy, without the jitters
- Cordyceps for heightened mental focus and clarity
- Enhanced mood and motivation
- **Proprietary terpene blend for enhanced benefit**
Energize contains an innovative and proprietary Terpene blend, containing **Beta-Caryophyllene**, **Alpha-Humulene**, **Alpha-Bisabolol**. These powerful terpenes combine to provide additional benefits, including support for faster recovery, better focus and balance, reduced oxidative stress, and enhanced overall health.

SUGGESTED USE:

- Mix one packet with 8-12 oz. of cold water and mix thoroughly. Use as needed.

FULL INGREDIENTS:

Organic Orange Flavor, Organic Lemon Juice, Organic Rice Maltodextrin, Organic Coconut Water, Organic Guayusa Tea, Organic Acacia Gum, Organic Tapioca Maltodextrin, Organic Cordyceps Sinesis Mushroom, Organic Arabica Gum, Organic Lucuma, Organic Baobab, Calcified Seaweed, Citric Acid, Silicon Dioxide, Organic Guava Leaf Extract, Organic Monk Fruit, Organic Stevia, Organic Mango Fruit, Organic Quillaja Extract, Organic Ginger, Organic Erythritol, Organic Proprietary Hemp Derived Terpene Blend

INGREDIENT HIGHLIGHTS:

- **Coconut Powder Extract**
Coconut water is rich in natural electrolytes, especially magnesium and potassium, and is the richest dietary source of cytokinins, plant hormones. It also contains enzymes, amino acids and phytonutrients. Coconut water is alkalizing, helping to restore a natural pH balance in the body and counter the effects of an acidic diet.
- **Lemon**
Lemons are an excellent source of naturally occurring vitamin C. They are a great source of dietary fiber and contain a number of vitamins and minerals, including B-vitamins (niacin, folate, thiamin, riboflavin, folate, pantothenic acid, pyridoxine) as well as zinc, magnesium, copper, iron, calcium and potassium.

- **Guayusa**
Guayusa (pronounced "gwhy-you-sa") responds differently than other caffeine sources with a significant impact on nootropic benefits such as mood and cognitive focus. This caffeinated leaf of the holly species grows only in the upper Amazon basin of Colombia, Ecuador, and Peru. Guayusa is uniquely different than traditional tea or yerba mate in that it tastes sweet, not bitter, and has a distinctively different impact on energy and focus, without the jitters of coffee.
- **Cordyceps**
Cordyceps can enhance athletic endurance and general energy levels for all ages. The complex, powerful combination of health essentials found in mushroom mycelium and fruit include beta glucans, alpha glucans, Vitamin D, B Vitamins, prebiotics, antioxidants, bioactive metabolites, digestive enzymes, and amino acids/proteins. Specific to mushrooms is also the "Super Antioxidant" L-Ergothioneine, which has shown to have a broad range of potential health benefits.
- **Marine Minerals**
Our marine multimineral complex is derived from 100% Calcified Seaweed, providing bioactive calcium, magnesium and 72 other trace marine minerals. Unlike other mineral sources, this unique mineral complex absorbs trace minerals from the surrounding seawater. This form of absorption results in a mineral rich product that is neutral tasting, free of chalky texture and easily absorbed by the human body.
- **Monk Fruit**
Our Monk Fruit (Lo han guo) has an extremely sweet taste is attributed to its high content of mogrosides. These are a group of terpene glycosides known to be 250 times sweeter than sucrose. Monk Fruit is also rich in polyphenols, and contains vitamins A and C, iron, potassium, calcium and 18 amino acids.
- **Guava**
Guava is incredibly rich in vitamins and other minerals, such as zinc. It is considered a superfood, that is known to possess more Vitamin C than an average orange, and more potassium than a banana. It also contains antioxidants that help fight free radicals.

*Always consult your physician before using any CBD products.

*All Green Compass products, including Broad Spectrum and Boost, could contain very trace amounts of THC that are below detectable levels by our third party lab tests. Products are tested by using liquid chromatography, detecting THC levels over 100 PPM. If you are subject to drug testing then you may want to consult with the testing facility and your employer before using these products.
